PROFESSIONAL EXPERIENCE

Field Supervisor — Ethical Research Solutions Ltd, Kigali

Sep 2025 – Present

- Supervise and coordinate field enumerators across multiple data collection sites, ensuring they follow research protocols and data quality standards.
- Review collected data daily for accuracy and completeness and give enumerators feedback to keep results consistent across CATI, CAPI and CAWI surveys.
- Train field staff on data collection tools, survey instruments and ethical research practices.
- Work with project management to resolve logistical and field-level issues so project timelines and targets are met.
- Prepare field progress reports with key observations, risks and recommendations for senior management.

Trainee — The Gym, Rwanda's most intense software development trainee program

Jul 2026 – Present

- Built full-stack, production-style applications end to end — Angular (standalone components, signals, RxJS) on the frontend, Node.js/Express and Python/Django REST Framework on the backend.
- Developed an Angular + GraphQL (Apollo) frontend for a performance and utilization-tracking system, integrated against a Spring Boot API.
- Collaborated in a cross-functional team (backend, data engineering, frontend) to build a multi-source, containerized BI pipeline — Django, PostgreSQL, Docker Compose, RabbitMQ.
- Shipped a dependency-free, installable JavaScript PWA (note-taking app) with offline support, theming, and a full authentication-flow demo.
- Practiced disciplined Git workflows — feature branches, pull requests, code review — across 10+ public repositories.

IT Support Intern — Ethical Research Solutions Ltd, Kigali

Mar 2024 – Mar 2025

- Supported the IT operations behind large-scale data collection projects.
- Troubleshoot network issues and maintained devices used by field and office teams, reducing downtime during data collection.

ICT Basic Training Trainer — ICTalk Rwanda, Kigali

Feb 2024 – Apr 2024

- Ran hands-on training sessions on Microsoft Word, Excel and PowerPoint covering document creation, basic data analysis and presentations.
- Taught fundamental computer skills: internet navigation, email and file management.
- Created training materials and user guides adapted to different learning levels.

Content Creator & Graphic Design Intern — Udushya Studios & Design, Kigali

May 2023 – Dec 2023

- Designed graphics, logos and promotional materials for clients' social media platforms.
- Developed content concepts and helped manage brand and communication materials.
- Worked directly with clients to create visual content and branding tailored to their goals and target audience.

Field Assistant, Data Collection — Ethical Research Solutions Ltd, Kigali

Nov 2021 – Aug 2025

- Collected survey data accurately and without bias using Computer-Assisted Telephone (CATI), Personal (CAPI) and Web (CAWI) Interview methods.

PROJECTS

Achievement Utilization Tracking System

Sep 2026

- Angular + GraphQL frontend for tracking employee achievements, utilization rates, and bonus metrics across teams, integrated with a Spring Boot backend.

Technologies: Angular 21, TypeScript, Apollo GraphQL, Tailwind CSS, Vitest

Repository: github.com/nzibukaemmanuel/Achievement_and_utilization_tracking_system

InsightFlow — Reporting Dashboard

Sep 2026

- Retail analytics dashboard (revenue, top products, satisfaction, regional performance) built frontend-first against a Spring Boot API contract, with JWT auth and route guards.

Technologies: Angular 19, TypeScript, RxJS, JWT

Repository: github.com/nzibukaemmanuel/retail_analytics_management_system | **Live:** retail-analytics-management-system.vercel.app

Marginalia — Note Taking App

Aug 2026

- Installable, offline-first note-taking PWA with categories, theming, and a full authentication-flow demo — vanilla JavaScript, no framework.
- *Technologies:* JavaScript (ES6+), Service Workers, Web Storage API

Repository: github.com/nzibukaemmanuel/fem-06-note_taking_app | **Live:** fem-06-note-taking-app.vercel.app

Task Manager API Client

Aug 2026

- JavaScript client sharing one set of ES modules between a Node CLI and a browser UI to fetch, model, and analyze task data; unit- and integration-tested with Jest.
- *Technologies:* Node.js, JavaScript (ES6+), Jest

Repository: github.com/nzibukaemmanuel/Amalitech-Apprenticeship-specialization-labs

EDUCATION

Bachelor's Degree in Computer Science — University of Rwanda, Kigali

[Add start year] – [Add end year]

- Relevant subjects: Internet Programming & Web Optimization, Database Management, Software Engineering, Artificial Intelligence & Internet of Things.

Advanced Level Certificate — [Add high school name]

[Add years]

- *Focus subjects:* [Add subjects, e.g. Mathematics, Computer Science, Economics]

SKILLS

Software Development: Angular (Signals, RxJS, GraphQL/Apollo), JavaScript & TypeScript, Node.js & Express.js, Python & Django REST Framework, HTML5 & CSS3, Git & GitHub, Docker, Web Accessibility

Technical: Microsoft Office (Word, Excel, PowerPoint), Google Workspace, computer maintenance & repair, network troubleshooting, CATI / CAPI / CAWI data collection tools

Design & Media: Figma (UI/UX), Adobe Photoshop, Illustrator, Premiere Pro, After Effects, social media management

Professional: Team supervision, training & mentoring, reporting, communication, problem solving

Languages: Kinyarwanda (fluent), English (fluent)

VOLUNTEER WORK

- [Add role — organisation, dates, e.g. Coach at a Code + Design Camp, Women in Tech Week, community or church activities — or delete this section if none apply.]

HOBBIES

- [Add hobbies, e.g. photography, football, reading tech blogs, drawing — or delete this section if you would rather leave it out.]
